

ANIKET MISHRA

+31 6 8732 5708 • anmishraofficial@gmail.com • github.com/Aniket-Mishra • aniket-mishra.github.io • linkedin.com/in/aniket97

5 years building and deploying production data engineering, machine learning, and AI systems. Published ML researcher (IDA 2026). Seeking data science, ML, and data engineering roles starting August 2026.

EDUCATION

EINDHOVEN UNIVERSITY OF TECHNOLOGY (TU/E)

Sep 2024 - Aug 2026 (Expected)

MSc, Data Science and Artificial Intelligence

Eindhoven, NL

Major Tracks: Data Mining & Machine Learning; Data Engineering & Management

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

June 2016 - Sep 2020

B.Tech, Computer Science and Engineering

Chennai, IN

Thesis: Image Super-Resolution using Feedback Loops in GANs (Best Paper Award)

EXPERIENCE

EINDHOVEN UNIVERSITY OF TECHNOLOGY (TU/E)

Feb 2026 - Present

Student Assistant

Eindhoven, NL

- Teaching Assistant for MSc courses: Machine Learning Engineering and Reinforcement Learning in Practice; mentor 50+ students providing technical feedback and project guidance.
- Maintain RL course repository, implement new agent environments and CLI/UI features. Develop components of an automated grading system.

AVATHON (FORMERLY SPARKCOGNITION)

Mar 2021 - Jul 2025

Data Scientist / Data Engineer

Bengaluru, IN

- Authored a Python framework adopted company-wide, reducing customer onboarding from **3 months to 1 day**.
- Built real-time ETL pipelines for **10GW+ renewable energy assets**, reducing data latency and cloud costs by **~55%**.
- Developed anomaly detection and failure prediction models for solar, wind, and battery assets (**>95% accuracy, 2-4 month lead time, 98% false alarm reduction**).
- Optimized AWS Lambda ETL and Elasticsearch queries, cutting compute costs by **48%** and data pull times from **4+ hours to ~15 minutes**.

INFOSYS LTD.

Jan 2020 - Mar 2021

Systems Engineer, Data & Analytics (incl. Internship)

Mysore, IN

- Maintained ETL operations for **2000+ Informatica workflows** providing on-call production support for global clients.
- Supported client database migration, performing data validation and reconciliation checks with **zero data loss**.

SKILLS

Languages Python, SQL, Rust, JavaScript, PySpark, C++, Bash

Data & Cloud PostgreSQL, MySQL, InfluxDB, Elasticsearch, AWS, GCP, Docker, Airflow

ML/AI PyTorch, Scikit-Learn, Statsmodels, Transformers, Numpy, HuggingFace, AutoML, LLMs, AI Agents, MLX, Ollama

Tools FastAPI, REST APIs, Grafana, Kibana, Claude Code, Codex, Streamlit, Git, Jira, Confluence, Postman, LaTeX

PROJECTS

ShieldPay Agentic fraud prevention with merchant risk assessment and auto-generated virtual cards via bunq API.

Synthetic Data Generator Physics-grounded sensor telemetry simulator with configurable fault and attack injection.

Full Archive Complete project portfolio available on [\[GitHub\]](#) and [Portfolio Website](#).

PUBLICATIONS

INTERNATIONAL SYMPOSIUM ON INTELLIGENT DATA ANALYSIS (SPRINGER LNCS, VOL. 16513)

Apr 2026

- **Mishra, A. et al.** *Exceptional Model Residual Mining, and Three Richer EMM Description Languages*.

RCICD CONFERENCE, BEST RESEARCH PAPER AWARD

May 2020

- **Mishra, A.* et al.** *Image Super Resolution using Feedback Loops in GANs*.

CONFERENCES & HACKATHONS

IDA 2026, Leiden Presented paper on Exceptional Model Residual Mining (Springer LNCS vol. 16513).

Apr 2026

bunq 7.0 Hackathon Built ShieldPay: agentic AI fraud prevention using Claude tool use, bunq API, and FastAPI.

Apr 2026

HAC-2020 Technical Team Lead, Organizing Committee | **HAC'KP 2020**: Top Qualifier

2020
